

BCOP 2006

by c/Amn Ryan Young

On December 2nd and December 3rd 2006, cadets from Groups 2, 3, and 800 attended a Basic Cadet Orientation Program at Quakertown Airport, commonly referred to as BCOP. During the 2 days the cadets were taught many different things

- Correct Drill movements
- The many different programs in CAP
- The Cadet Oath and what it means
- The Core Values and what they mean

- What they get out of CAP
- Aerospace
- Safety at public CAP affairs
- How to use a Log Book
- How to wear their uniform correctly

The cadets also viewed a special CAP “Dare” program taught by 902’s own Major Postupack. I personally, as a cadet, had a great time and now have many new people to look up to as leaders, teachers, and friends.
